Surgical Concepts in Cataract Management.

ARTHUR LIGHT, M.D. LECTURESHIP

AND OBJECTIVES
Design changes in intraocular lenses and surgical techniques for treating cataracts are rapid and constant. The late John J. Skowron, M.D., was a graduate of the Stritch School of Medicine Class of 1943. His dedication to teaching and compassionate care of his patients has earned him keen interest in educating ophthalmology residents. Through his generosity, twice each year we present a prominent subspecialist in ophthalmology to discuss a current topic in that field. This program will address the newest information, designs and techniques in these areas.

COMPETENCIES ADDRESSED
This educational activity is designed for ophthalmologists and ophthalmology healthcare professionals who perform cataract surgery, and/or treat and manage glaucoma and remain current in their understanding of and experience with the myriad of treatment modalities. The program will address the newest information, designs and techniques in these areas.

ACCREDITATION
The Loyola University Chicago Stritch School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
