OUR SERVICES (CONTINUED)

POSTER PRINTING
We are conveniently located in the Stritch Building, offering affordable printing services for large posters and technical drawings. We charge only $1 per linear inch for matte and $1.30 per linear inch for glossy, on 36” and 42” rolls.

VHS-DVD CONVERSION AND DUPLICATION
As a convenience to faculty, we can convert VHS tapes to DVD for educational purposes only. Due to copyright laws, we can only convert one copy and the original must be commercially-produced media. We can also make multiple DVD copies for student distribution, but the requesting department must supply their own DVDs. Completion time is usually 5-7 business days.

TEACHING/LEARNING PROJECTS
Is there a technology that you have seen but Ed Tech does not provide? Let us know what you are trying to accomplish, and we will work with you and our vendors to find a solution.

Integrating Technology & Medical Education

July 25, 2017
EDUCATIONAL TECHNOLOGIES

The Educational Technologies Department maintains the audio-visual equipment in classrooms and lecture halls at Loyola University Chicago - Health Sciences (Maywood) campus. We strive to integrate state-of-the-art digital technology in our facilities to provide students, faculty, and instructional staff effective learning and teaching technological tools for outstanding medical education and research.

OUR SERVICES

AV HELP

For immediate AV assistance, call extension 65992 or (708) 216-5992. We support the audio-visual equipment in the Cuneo Center Stritch School of Medicine (SSOM), the Marcella Niehoff School of Nursing, (MNSON) and the Center for Translational Research and Education (CTRE).

ROOM TECHNOLOGY TRAINING

First time in a classroom or lecture hall? Need a refresher? We offer on-site training! Book the room you wish to be familiar with, then e-mail us to schedule a training session.

ON-SITE / OFF-HOURS AV SUPPORT

We support events during office hours. However, on weekdays before 8:30am, after 5pm or on weekends, we require an Off-Hours AV Tech Support Request Form, downloadable from our website: http://ssom.luc.edu/tech_support/. This requires at least 4 weeks notice, department head approval, and may incur a fee.

ADDITIONAL CLASSROOM TECHNOLOGY

We encourage creative use of teaching and learning technology. We can provide you with additional mics for panel discussions, document viewer, camera and mirroring of personal devices or demonstration of various medical devices or applications.

EQUIPMENT LOANS

EdTech has a limited number of portable equipment for loan on a first-come, first-served basis. This includes laptops, projectors, screens, HD video cameras, tripods, and portable sound systems.

LECTURE CAPTURE

Lectures in Stritch Lecture Halls 190/390 and Case Method 360/460 are automatically recorded in 30-minute segments and then streamed for viewing only via the LUMEN website. Panopto is a university-licensed lecture-capture software available to those having valid LUC UVID and password. Camtasia Studio is a screen capturing software with great editing features, installed in select Stritch rooms. Record your lectures using Camtasia at your convenience in our professional recording studio located in Room 184. We also have a laptop loaded with Camtasia 9 which can be installed in any lecture hall or classroom. Both Panopto and Camtasia require a microphone or webcam, which you can request to borrow via e-mail at edtechsupport@luc.edu.

LIVESTREAMING VIDEO

Ed Tech’s livestreaming service is the real-time broadcasting of events to an audience online. Viewers can use their smartphone, laptop, tablet, desktop computer or digital screen. Interaction with the host or other viewers occurs via text chat. Previous events that Ed Tech covered include: The Niehoff Pinning Ceremony, Stritch Graduate Honors Ceremony and streaming to another room/building for overflow guests.

VIDEO CONFERENCING

Zoom and Skype for Business are university-licensed, web-based video conferencing platforms that are becoming more popular because of their features, reliability, and portability. If you need help in hosting or participating in a video conference, send your request to edtechsupport@luc.edu 5 days in advance. It is good practice to schedule a test a few days prior, in the same event location. We have video conferencing kits containing a microphone and webcam available for loan.

VIDEO RECORDING & EDITING

High-Definition video cameras are available for loan. We also have software to edit, render, and upload videos in various formats. Our staff can assist with on-campus setup, basic editing and post-production.

ON-SITE LECTURE RECORDING STUDIO

Record your lectures in our professional recording studio located in Stritch room 184. Please e-mail us or call extension 65992 to learn more, or to schedule time for recording/editing.
