New Projection Screens in SSOM Lecture Halls

HSD Educational Technologies is pleased to announce that new projection screens have been installed in Tobin and Leischner Halls. These replace the torn screens that were original to the SSOM building. As a result, the ability to raise and lower the screens in both lecture halls have been restored.

You may notice the new screens look different. This is because screens manufactured today follow the new aspect ratio of 16:9, whereas the old screens were in the 4:3 format. You may be thinking, “How does this affect me and my PowerPoint presentations?” The answer is: it may not affect you now – but you need to prepare for next year when we move to 16:9.

Future HSD Presentation Format

Beginning in July 2016, all HSD classrooms and lecture halls will switch to the 16:9 format, which became the standard in 2009. Our goal is to standardize the presentation format across all HSD campus buildings, including the new Center for Translational Research and Education.

If you have any questions or concerns, please feel free to reach out to us at EdTechSupport@luc.edu, and we will be more than happy to assist you.

*Please note that the new screen in 390 was damaged during installation. It is still useable, but it will be replaced in early October.
