ASPIRE

ASPIRE is designed to prepare pre-medical students who have a desire to advocate for underserved communities. During the five week program, students are exposed to a comprehensive curriculum that integrates academic/science lectures, shadowing opportunities, professional development skills/tools, and a community service project that advances health equity.

Program Objectives:
- Understand the importance of healthcare equity
- Gain knowledge and clinical skills to work effectively in underserved communities
- Prepare students to be competitive applicants for medical school
- Build leadership skills and professional development
- Develop and implement community service project
