“Challenging Learners in Challenging Times: Survival Tips and Tricks of Great Medical School Teachers”
Saturday, April 2, 2016
9:00am - Noon
Loyola University Chicago Stritch School of Medicine, Room 360
Presented by the Ralph P. Leischner Jr Department of Medical Education

This unique workshop for community-based medical school faculty will focus on ways to be a great educator in the current health-care climate. The many increasing demands on physicians can be less than supportive of mission-based activities such as mentoring medical students. We will consider ways to pass on our profession as healers effectively and share pedagogical strategies to challenge learners and for dealing with learners who can be challenging. You’ll have opportunities to share your insights and to hear of the successful and not-so-successful approaches of colleagues. We will also recognize outstanding community faculty selected by Stritch medical students

9:00 – 9:20am  Breakfast
9:20 – 9:50am  Mission Statement- John Hardt, PhD
9:50 – 9:55am  Introductions
