Graduation Requirements at a Glance
Class of 2020

The following information is provided as you develop your fourth year schedule to ensure that you will satisfy all graduation requirements in effect for the Class of 2020. Graduation requirements for your class include successful completion of:

- All Pre-Clerkship courses and Required Clerkships, including the three required fourth year clerkships: Emergency Medicine, Sub-I ICU, and Sub-I Wards.
- A minimum of 26 weeks of ELECTIVE clerkship credit—including at least four full-time 4-week electives during your fourth year. You are limited to 12 weeks of elective credit in any one specialty area during your fourth year. You are also limited to a maximum of three weeks of elective credit from the preclinical years. Please consult the Elective Requirements at a Glance document and the policies section of the Elective Course Catalog for specific details relating to satisfactory completion of your elective requirements.
- You must be enrolled in a minimum of 12 weeks of required or elective coursework in the spring semester of your fourth year.
- The following Bioethics & Professionalism Requirements:
  1. Case Analysis Paper - Must have with a grade of Pass reported.
  2. Ethics Grand Rounds - Attendance at a minimum of four Ethics Grand Rounds sessions.
- United States Medical Licensing Examination (USMLE) requirements:
  1. A passing Step 1 score by the end of your third year.
  2. Passing scores for the Step 2 Clinical Knowledge and Step 2 Clinical Skills exams prior to graduation. You are required to take your Step 2CK and Step 2CS exam before January of your fourth year.

PLEASE NOTE: An audit of your progress towards satisfying graduation requirements will be completed by the middle of October and in February of your fourth year. You will be sent a copy of the audit results; any deficiencies that must be satisfied for graduation will be noted. Although we conduct this audit as a service to you, responsibility for satisfying graduation requirements ultimately rests with you. Your program should be planned in consultation with your advisor to complement your medical education and competency in the various specialty and sub-specialty areas available.
